# IZMIR TINAZTEPE UNIVERSITY
# INTERNATIONALIZATION POLICY

**Purpose:** Izmir Tınaztepe University aims to be an internationally recognized university that combines technology, life, and social sciences in the field of health, with a scientific approach, qualified graduates, and contributions to society, nature, and the future, shaped by the participation and feedback of students, academics, other internal and external stakeholders. It aims not only to enrich the educational experience of international students and academics but also to enable national students to contribute to internationalization, thereby increasing its international recognition and becoming an international center of attraction in the field of health education.

Izmir Tınaztepe University adopts the following principles and fundamentals within the scope of internationalization and declares that it will carry out the tasks defined in this process:

- To determine, implement, monitor, and develop the goals of education and training, research and development, and social contribution in internationalization.
- Developing strategies to increase the university's international recognition and visibility and establishing and developing lasting and sustainable partnerships with the world's leading universities and institutions.
- Conducting international student recruitment efforts to create a multicultural university.
- Supporting the accreditation of educational programs by national and international accreditation organizations.
- Becoming the university of choice for qualified students in internationalization and making this sustainable.
- Establishing inter-institutional collaborations within the scope of international exchange programs, thereby enabling both students and academic and administrative staff to gain international exchange experience.
- Host international scientific, cultural, and artistic events and meetings.
- Encourage academics to increase the number and quality of international joint scientific publications.
- Encourage efforts to increase the number of international joint projects and international patents.
